# ComplianceHub news and knowledge portal

The Hungarian Corporate Compliance Society ([www.compliancetarsasag.hu](http://www.compliancetarsasag.hu)), as a professional organization of compliance, has been successfully promoting and disseminating its knowledge for the past decade, bringing together the Hungarian compliance and legal professional community, whose members can thus further deepen their knowledge, advance their careers, build relationships and stay up to date.

With over 300 members, it is now one of the most significant professional organizations in Hungary, which has thus become an indispensable player in the domestic and international compliance society.

The idea of bringing compliance news, services and materials, created by working committees, to one surface gave rise to the ComplianceHub news and knowledge portal, which aims to educate and inform with modern tools the professional community interested in the compliance field apart from providing current domestic and international news.

- ❏ However, it is important to highlight that, given the high level of interest, ComplianceHub now collects news, professional materials, job offers, services, available educational podcast videos, downloadable professional guidelines, workshops, events, and courses from all areas in the corporate lines of defense – including internal control and risk analysis, compliance, and internal audit – on one platform.
